“For our light and momentary troubles are achieving for us an eternal glory that far outweighs them all.” 2 Cor 4:17

A Personal Story - from Bob Boyd

Although I have a very good diet, I exercise (walk/workout) daily, I don't smoke and am not overweight, have low blood pressure and low cholesterol levels, about 2 ½ years ago, when I was 59 years old, I noticed a pain in my chest when I walked uphill. It seemed to get worse as time went by. So I went to a cardiologist's office and had a stress tread mill test. They called the test off after 9 minutes. I was sweating profusely and had much pain in my chest. The cardiologist told me I had a block in the major heart artery and I was not to exercise, or even walk but get more tests – like an angiogram. We didn't like this doctor. He was impersonal, cold, seemed angry and said vitamins were a waste of money. We would never go back to him. We didn't trust his advice so we walked and exercised and didn't get the angiogram. We had been getting mail from Dr Julian Whitaker's clinic that warned us not to get any invasive tests like angiograms. That heart disease could be cured without surgery or drugs, and the medical/pharmaceutical industries were just out for money.

So we went over to the Whitaker Wellness Institute of Newport Bch Cal and saw one of Dr Whitakers doctors who prescribed mega-dosages of vitamins and EECF (computerized squeezing of the legs to push blood back into the heart arteries and open up collaterals.) The EECF helped, it seemed to get better, but I still had some pain in my chest when I walked uphill. For 2 ½ years I seemed to have it under control.

On an interview for *Issues in Education* Dr Whitaker (author- *Reversing Heart Disease*) said, “Studies show stents and bypasses do not extend lifetimes.” Since some people die on the operating table, and others re-stenosis, the overall survival rates are not any better than natural therapies, why take a chance with an operation? According to Dr Whitaker, “Stents are techno-idiocy.”

I had talked with other people who didn't do well with stents or bypasses. One said he had a bypass operation and was in recovery when the artery ruptured and he had to be rushed back into surgery. After that operation they were unable to stitch his breastbone back together. He was a mess and on the list for a heart transplant.

I was convinced that the natural approach would work. German researcher Dr Mattias Rath, author of *Why Animals Don't Get Heart Attacks -But People Do*, also reported finding a cure for heart disease from vitamins. I also received EECF treatments from and interviewed a former cardiac surgeon Dr Dwight Lundell, author of *The Cure for Heart Disease*. We also went to several other natural paths and tried other therapies.

My condition stabilized, I walked uphill with only a slight pain, for years. However, recently, when my editing computer crashed so did my heart. I had an old backup computer that I used but it malfunctioned. Words that were there a few minutes ago totally disappeared. Large segments of the program changed from wave form to no form. It was very frustrating. I had no other back up computers, I had to make it work. I began to think this computer would also crash.

Late one night, in spite of malfunctions, I had finished making two programs but didn't want to shut it down because I could lose those two programs. So I told Geri I would stay up late until I finished. When I went back and looked at the computer I felt such angst, a crushing pain in my chest, like the heart arteries were closing down. That lasted only a moment. It wasn't a heart attack but I noticed chest pain more often.

We continued to pray and God continued to work for us. It was almost as if God brought a new cardiologist to Prescott a year ago and moved him right next door to us. We saw Dr Shields Stutts, and his wife Sylvia, outside regularly and became friends. To get an excellent cardiologist of 39 years experience to move to our

little Prescott (pop 40,000) is no small thing. I began to experience more chest pain with less exertion so we made an appointment to Shields in a couple of weeks. But with the increase in pain, I called a week early and asked for a prescription of Nitroglycerin. They told me to come in immediately. I did. It was Good Friday.

The next morning I went to the hospital for an angiogram. In the angiogram, Dr Stutts painlessly punctured and inserted a sheath in my large femoral artery in my groin to insert a tiny wire to run up into the heart to “see” where the block was. It was painless. It showed us on the angiogram how the major artery looked as big as a drinking straw at the top, but narrowed down so much it had only a thread of blood continuing to the heart muscle. A stent was out of the question. ***An immediate bypass operation was my only hope.***

My main coronary artery was so blocked (99%), the cardiologist said there was barely enough room for single blood cells to squeeze through. The artery was almost completely closed and was continuing to fill up fast. There’s a point in the main coronary artery called “the widow maker.” If the block occurs there, there’s no blood for the majority of the heart muscle and a result is a fatal ***massive coronary.***

My block was in the very worst possible place. It was worse than “the widow maker block.” It was above it and if it became completely blocked, I wouldn’t have made it to the hospital. It wouldn’t have been a partial or slight heart attack but a fatal, massive coronary. To show how close it was to being completely closed, during the week or two before surgery, I couldn’t walk more than a few yards without feeling angina or even eating a large meal or even thinking anxious thoughts and I would feel the pain in my heart. I was getting close to a complete block.

Surgery was scheduled for Monday afternoon. As I lay in that hospital bed, watching the slow ticking of the very slow clock, time never went so slow. I had lots of time to think of what was going to happen. I would be shocked awake with fearful thoughts of complications, having my breastbone sawed open, and veins removed from my legs for the bypass, in just a few hours. **But I had no choice!** So Geri and I prayed again and again, and felt the Lord’s leading us to have this operation so we were ready for it and hoped it had already been done.

We continued to pray and God continued to work on our behalf. It was as if God had moved one of the best cardiac surgeons in Phoenix to our little town only 6 months ago. To get a cardiac surgeon of Dr Pierre Tibi’s renown to come to Prescott was very unusual. He was in charge of one of the best cardiac surgery clinics in Phoenix and very successful. He is independently wealthy. He had performed over 5,000 bypasses. He wanted a slower pace in a smaller community and just recently selected Prescott, just when I needed him. I wonder if God had anything to do with that? Dr Pierre Tibi, brilliantly performed my bypass operation perfectly, with no need for any transfusions and no complications. I am amazed at how he could sew little *spaghetti noodle-like arteries* and veins together by hand a stitch at a time.

When you consider all the numerous procedures he had to do ***perfectly,*** I am amazed. The chest bone was sawed in two with a jig-saw. The rib cage had to be spread wide open. The left lung had to be deflated to provide access to all sides of the heart. My heart had to be stopped and later re-started with electric paddles. I was put on the heart/lung machine so the heart could be cut on. The mammary artery was cut and stitched around the blocked artery. Three veins were meticulously mapped and cut from my right leg and used to bypass three other heart arteries. Physicians Assistant Brian Allshouse, was the first in Arizona to cut veins using an instrument that goes under the skin and removes them without a long gash in my leg. He did a great job, and I had **no pain** later.

To avoid pneumonia, the cardiac surgeon, Dr Pierre Tibi, inserted a tube from my lung through a couple of ribs to drain fluids from the lung. Later the scar left from the chest tube looked like a spear hole. It was painful to breathe with that tube in my lung. Two other small holes were made to drain the other lung and heart.

When I came out of surgery, I had a hard plastic ventilator tube that ran from beside my tongue, down my throat, through my vocal cords and into my lungs to keep a clear airway. It was taken out a few hours later.

The next day I was told to get up and walk. I did. I was operated on Monday and was home by Saturday and was exercise walking once again. Geri looked at me and said I looked as if nothing had happened. Although I suffered physically, she suffered emotionally. I think it's harder for the one watching their loved one suffer.

GERI: I was so relieved to find out that Bob's surgery went well and the nurse told me he was back in his room and everything was OK. I was grateful to the Lord and felt such peace. ***Then the fire alarm went off.*** Just what I ***didn't need.*** My stress level shot *out of the roof* as I thought, "Oh no. Is it a '**CODE BLUE?**' Is Bob okay? Is this alarm for him? A few minutes went by and someone said it was a fire alarm. Then I thought, "**Maybe the hospital is burning down.**" It didn't matter I was going to stay in that waiting room until I could see my sweetie! Eventually the alarm stopped, the hospital wasn't burning. It was just a drill. *What great timing.*

I thank God for **Geri**. What an amazing woman. She watched over me, asked questions of doctors and nurses, got me off the breathing tube much sooner, and did everything for me. She lifted the heavy drinking water bottles (55 pounds), drove me since I wasn't allowed to drive, fed me, fetched whatever I needed and nursed me back to health. She ***prayed continually day and night*** for me. I was a single man for many years before I become ONE with this Godly, wonderful woman. As a single man there's no help like this. ***I am so in love and couldn't live without her. At least I wouldn't want to. Amen.***

When you think about all the procedures I'd been through, no one would want to go through all that, but I had no choice. If I didn't have the operation, I had only so many days or hours and I would have a massive coronary. So I welcomed this operation, the sooner the better. I had to overcome a lot of fear, so I turned to God. I belonged to God. God would take care of me, and He did. Right after this life giving surgery, I had a "renewed lease on life." Fortunately I was spared any heart damage from a heart attack. My heart is healthy. It was "just" the clogged arteries.

As I look back on all the procedures, cutting the breastbone and spreading my chest wide open, then sown back together with wire, the deflating of a lung, the chest tube sticking out of my chest for days, taking veins out of my legs, the only pain I had was a sore mouth from the ventilator. Ironic isn't it?

As I stood in front of a mirror looking at my chest, I saw the 8 ½ scar from the top of my breastbone to three inches below it. I saw the 1 inch scar where the chest tube was and the other two holes for draining the lung and heart. I asked Geri what the scar on the side of my neck was for. She said, "Don't you remember that's where they pushed that big needle to establish a central line directly into your heart?" I did remember how that hurt when they pushed it deep into my chest from the side of my neck. But I also remember the joy of having that central line removed. What joy to get all the tubes out!! What a medical (near) miracle to get such a reversal of a death sentence.

One thing about being dedicated to serving the Lord, whatever happened to me was up to HIM! If He wants me to continue serving Him on earth I will – gladly. If He wants to bring me HOME, to heaven, I am ready. *It's all about the Lord*, live or die I am HIS! Jesus said, "Whoever wants to save his life will lose it, but whoever loses his life for Me will find it." Mt 16:25 That made it easy. That takes the worry out of trying to hold onto this life. As Paul wrote, "For to me, to live is Christ and to die is **gain**." What a blessing not to have to worry about this earthly body. *Life and death are totally in His Hands.*

That's what the stories of people in the Bible are there for. To give us examples of how to face life's toughest problems. Paul said, "For me to live is Christ - to die is gain." How would he feel if he was told he was going to die of cancer? Would he fear it? No! He would rejoice knowing he's going HOME. What about **torture, chemo**

or radiation? The martyrs throughout history demonstrated their faith by suffering the very **worst tortures**. That's what makes us different from those without our hope.

Today there's strong emphasis that the Christian life is to be trouble-free. Where every problem is solved with a simple prayer. No one should ever get sick, or, if he does, he should be healed immediately with simple effortless faith. But what about those who are not healed? What about the benefits of SUFFERING?

“For our *light and momentary troubles* are achieving for us an eternal glory that far outweighs them all. So we fix our eyes not on what is seen, but on *what is unseen*. For what is seen is temporary, but what is unseen is eternal.”

Five to six million Christians were martyred during Rome's persecutions, beginning with Nero's fire. Heroes of the faith are developed by **God**. **God** invests time and trials in making each believer a hero of the faith. God doesn't *waste trials* on anyone. Every trial accomplishes two purposes:

- (1) It gives us the opportunity to **honor** God by **trusting** Him, and
- (2) It gives God the opportunity of showing **how faithful He is** in taking care of us. It is **in the trials** we are drawn toward our God in dependence, humility and trust. Without a trial there would be no real spiritual growth. Turn your problems into friends by **thanking** God for whatever trial He allows to come into your life.

Have you ever really appreciated a heart that beats without pain? Have you ever really appreciated being able to walk uphill without a pain in your chest? Have you ever appreciated a deep satisfying breath of air? The little things we take for granted are gifts we don't appreciate until we lose them. We may want *more things*, money, time off from work but the basics like a healthy heart and the ability to move, breathe, THINK and SEE are never appreciated until they're gone. And most of all, the most precious gift of all, that Jesus gives anyone who asks, lasts FOREVER! It's eternal life and eternal health.

What does “Jesus Saves” mean to a generation that has no idea Who He is or what He saves them from?

A generation that is lost doesn't know they need a SAVIOR.

Is HELL a real place? What happens to people who die but don't go to heaven?

If hell did not exist, why did **Jesus** talk about a place of “**eternal punishment**” so much?

For those who say, “Oh I don't believe in hell,” not believing in hell doesn't make it go away. **LISTEN!** In hell, all your worst fears and nightmares come true. This is a place of intense heat, constant torture, fear, regret, pain, desperate screaming, loneliness- you will never see any of your loved ones or anyone else you knew on earth.

Who is Bill Wiese and why was his spirit taken to hell IN A VISION for 23 minutes? **Bill Wiese**, author of the top selling book, **23 Minutes in Hell**, gives an eye witness account of the searing heat, the terror-filled screams of people burning in the flames and the ghoulish demonic beasts that ripped his flesh apart.

Jonathan Edwards, one of America's greatest preachers, said “Almost every natural man that hears of hell *flatters himself* that he shall escape it. “Edwards, author of *Sinners in the Hands of An Angry God*, preached such powerful messages on *hell* that people *screamed aloud, clutched the backs of pews and begged God to let them into heaven so they wouldn't risk going to hell*. Edwards is credited with starting one of America's greatest revivals, yet seldom is the subject of hell preached from today's *seeker sensitive* pulpits.

Forever part 1 & 2 # 1041& 1042

Many people have been saved by listening to these programs. **Bill Wiese** tells how he awakened in the middle of the night *in a vision* where his spirit actually was transported to a very real place called hell. Bill's testimony is absolutely fascinating. This *life changing program* is a great witnessing program to give unbelievers. If most people don't believe a literal hell exists, why do they need a savior? Why did the Lord choose a low-key realtor, not a preacher, to transport to hell in a vision?

How to Save Your Children from Hell #1043

If you've heard the program above called **FOREVER**, you know how serious and **REAL HELL** is and why you will want to do *anything* to avoid it, right? But listen, of all the people who escape hell **83%** do so when they are between the ages of **4 and 14**. The probability of an adult age 19 and over escaping hell is only **6%**. **ONLY 6%!!!!** Now do you see the eternal importance of a Biblical education? It makes the difference between heaven and hell.

What's important to God? Why does **CHURCH exist** if not to **teach** the children? Have America's schoolchildren been **kidnapped** by *atheists, drugs pushers* and **homosexuals**? Look at what's being taught! Some Christian leaders try to justify sending little children to public school by saying they will be witnesses for Christ there. But is that realistic to send a little child into a humanist school system? Look at the results. 9 out of 10 lose their faith in public school.

Now consider this real witness for Christ. It's not a **child** but a **church** opening its doors Monday through Friday for a Christian education. **OPEN** for the **whole** community. That's what missionaries do overseas! Why not here? Yet only 3- 5% of churches have a Christian school, why?

Churches are careful who they let teach Sunday School and what they teach the children on Sunday, then turn their church children over to a school system they know nothing about. We've interviewed sex ed. teachers who operated an **abortion clinic** down the street from the school. The underlying philosophy in all public schools is that man *doesn't need God*. By law, humanism is all that's taught. Solutions are all man centered. For humanists there is no Supernatural, no God and no Savior. Only pro-evolutionary indoctrination is taught. No Intelligent Design, not even both sides of evolution. And often the supposed evidence for evolution has been disproved decades ago.

Pastor Steve Schlissel, author of an article, "*How to Send Your Children to Hell*," gives the Biblical way to educate children and a vision for transforming our culture by turning *churches into schools* Monday through Friday.

Discovering Christian Schools #1038

What's the most important decision a parent can make in their child's education? A recent poll showed that 1/3 of teens claim they are Christians. But how can they be *if they don't even know what a Christian believes*? 50% said, "A life of good works will get you to heaven"; 35% don't believe Jesus rose from the dead; 1/3 believed Jesus sinned. Pastor **Bob Rosio** tells how and why he founded the Cheswick Christian Academy. **Harold Naylor**, co-founder of Discover Christian Schools.com says, "There are no do-overs in your child's education...it will determine who they become."

The Business of Christian Education #1048

It may sound crazy but it is possible to be of great service to the Lord by starting pre-schools that evolve into Christian schools and make lots of money at the same time. This may be what it takes to mobilize Christians and break the public school monopoly and **WAKE Christians UP**. It's past time!

At a time when Christian education is as important as the very survival of Christianity in America, very few churches have a school or a vision for education. What's the solution? Continue sending innocent Christian children into enemy territory or for businessmen and educators to open up profitable schools? How can Christian schools compete with free public schools for the minds of children? How can the power of Christ change America? **Dr Ellsworth McIntyre**, author of *How to Become a Millionaire in Christian Education*, built a chain of Christian schools, with over 2,000 children, starting from scratch. Today Dr McIntyre trains others how to be successful in Christian education. His vision is to make Christian schools as plentiful as McDonalds.

At the tax funded TIZA Academy, students are openly **praying** in the gym, ritual **cleansing** in the bathrooms, and **praying** to Allah every day in this public school, paid for with tax dollars. This is a charter school that's in a Mosque in Minneapolis. ***Are the Muslim boys being indoctrinated into violent jihad?*** What if this school had been found with so much as a copy of the **Ten Commandments** in its dumpster? Lawsuits would have already been filed and it would be out of business. Yet some are suggesting this school may be crossing the line.

- A Des Moines, Iowa imam gave the opening prayer at the Iowa 2008 legislative session, in which he called on Allah to “give us victory over those who disbelieve” – meaning victory over “infidels.”
- A Muslim demonstration was held in an American city, and Muslims trampled the American flag while proclaiming allegiance only to Allah and Islamic law.

Educating into Jihad part 1& 2 # 1044 & 1045

A 7th grade history book, HISTORY ALIVE, used in thousands of schools, says *Jihad* is simply an *inner struggle* to overcome *evil* and correct *injustice*. But what do they mean by “injustice,” and “evil” in Sharia Law? *Killing Jews and blowing up innocent civilians in Twin Towers?* Cutting the hands off little boys who steal an apple? America used to be a MELTING POT of various cultures coming together to become Americans. But Muslim students are purposely trying to stand out and be different, by wearing Muslim headscarves, berkas, beards etc.

Nonie Darwish, college educated in Egypt where she worked as a journalist, is the author of *Now They Call Me Infidel – Why I Renounced Jihad for America*. She says the main purpose of her education was to instill a commitment to destroy Israel. Peace was never an option. Americans have been deceived as to Islam's goals in America. We are in more than just a RELIGIOUS war. Islam isn't just a religion but a political, legal, social and economic way of life.

How is Islam being advanced in our public schools? Through distorted and sanitized depictions that glosses over or denies the Qu'ran's repeated commands to subjugate and kill “infidels.” Arab oil money is buying influence on American campuses and changing the beliefs of students, literally becoming hotbeds for Islamic indoctrination. An American university student said she wants Sharia law *imposed* on her country. IMPOSED! Not voted on, debated or accepted but forced on Americans. Doesn't she realize women don't even vote under Sharia Law? Is she willing to throw out all the *peace and prosperity* she takes for granted in this country for oppression and barbaric law?

Did they come here to fit in or change our culture? If they love the Islamic culture, why not just live over there? Why do they want to *change this culture?* **Nonie Darwish** left a culture of *hatred and death* for a culture of *joy, peace and love* that encourages endless possibilities. She is alerting us to the impending dangers of the growth of Islam in America where tens of thousands of mosques are going up and church bells are silenced.

- Most mosques are involved in some outreach. During the past 12 months, a *majority of mosques have visited a church or school to present Islam. More than 20% of mosques have a full time school*, whereas less than 3-5% of Churches have a school. *What's wrong with this picture?*

What's the significance of minarets going up and church bells being silenced? There are mosques with minarets over South St Louis complete with loud speakers. Five times a day the call to worship goes out.

- Are Muslims using *our freedoms to eventually abolish them?*
- The Bible smuggler Brother Andrew said, "There are two kinds of people in the world- those who say about persecution, '*It will never happen here!*' And those who say, '*I thought it would never happen here!*'"

Marketing Evil As Good # 1039

Just as marketing sells products, so marketing has changed our most cherished beliefs and corrupted this nation. The "marketers of evil" have marketed *evil as good* so that killing a child is promoted as "reproductive freedom." How has our culture come to tolerate and even embrace and champion things that would horrify our parent's generation? Brilliant marketing has transformed America. *Corruption has been disguised* and promoted as freedom. The "marketers of evil" are setting us up for a socialist nation that will come under God's severest judgment and American's are buying it.

David Kupelian, author of *The Marketing of Evil*, is the managing editor of worldnetdaily.com. His book is a serious wake up call for all who cherish traditional values and the *innocence of children*. Although we live in an increasing corrupt culture, so did the Apostles in Rome. This is an opportunity for us. If the "marketers of evil" can persuade this culture to believe evil is good, can't God, working within His people, persuade them to turn to God and find true life? Certainly HE can.

Home Schooling Under Attack #1046

Is home schooling becoming illegal *again* in America? The 2nd District Court of Appeals ruled that parents *do not have the right* to home school and they could lose their kids and go to jail. Can you imagine one inmate asking another, "What are you in for?" "Armed robbery. What about you?" "I was convicted for home schooling my children." Will home schoolers become criminals? Instead of the school system that is criminal in teaching only a positive portrayal of homosexuality and corrupting the morals of children, *it's the parents who are seen as criminals*. The court is in essence saying, "We don't trust parents with OUR children. Too many are slipping through OUR indoctrination process." This is an attempt to stop a massive exodus out of public schools.

Dr Brian Ray, President of the *National Home Education Research Institute*, and author of *Worldwide Guide to Home Schooling*, is an expert witness in courts and legislatures. This ruling has nothing to do with the success of home educators and *everything to do with state control over children*. The scope of this ruling against home schooling is stunning and a grave threat to all our freedoms. If you value freedom or any semblance of liberty, you will become actively involved in this fight over the children. Whoever controls the minds of the children *controls the future of the culture*.

An Economy on the Brink #1047

Are we on the brink of a CRASH? As the US dollar declines and oil and gold skyrocket, and banks are going bankrupt, are we on the brink of an economic crisis? Has America been sold to foreigners? Never in history have foreigners owned so much of our national debt. 80% of US treasury notes due in March 2010 are owned by foreigners. As the borrower is servant to the lender

(Pr 22:7), so our nation is becoming *enslaved* to other nations. What if they decided they didn't want US assets and dumped the dollar? Stocks, bonds and the value of the dollar *would crash*.

What if people decided they no longer wanted to accept a *piece of paper* as having any value? Our money is not redeemable for gold, oil, land or anything else. It's just a piece of paper that doesn't cost much to print. Let's face it, America *is bankrupt* and an economic crisis is in the making.

Economist, author and broadcaster, **Dr Larry Bates**, former CEO of a chain of banks, former legislator, and CEO of the *Information Radio Network*, gives predictions for the economy, real estate, and what you can do to protect yourself. How would a Democrat President affect the economy?

Turning Right #1049

Why are "peace studies" all about war? Why is it OK to kill innocent unborn babies but not to execute a murderer? How can campus diversity mean Democrats out number Republicans 10 to 1? **Keith Thompson**, author of *Leaving the Left-Moments in the News That Made Me Ashamed To Be A Liberal*, says, "Universities are now the soil and the seeds for the liberal left." The liberal left wouldn't cheer for any victories in Iraq, even when voters go to the polls despite terrorist threats on their lives. Why do some people hate President Bush more than they love freedom?

Joe Clark's Strategy # 1040

How can we transform America? By *transforming* American education. Where there's *no discipline* there's no learning. Many public schools have become war zones filled with violence, vice and vandalism. One of the most hopeless, drug and gang infested high schools was transformed into one of the nation's best. The famous principal, **Joe Clark**, (the movie *Lean on Me* was made about him), *revolutionized* Eastside High from a lawless, chaotic war zone into one of the nation's finest. Joe made the worst into the best. Joe says we need to instill *virtues and values* in our young people.

HUMOR

Only in America.....do drugstores make the sick walk all the way to the back of the store to get their prescriptions while healthy people can buy cigarettes at the front.

Only in America.....do people order double cheeseburgers, large fries, and a diet coke.

Only in America.....do they have drive-up ATM machines with Braille lettering.

EVER WONDER Why the sun lightens our hair, but darkens our skin?

Why women can't put on mascara with their mouth closed?

Why don't you ever see the headline "Psychic Wins Lottery"? Why is "abbreviated" such a long word?

Why is it that doctors call what they do "practice"?

Why is lemon juice made with artificial flavor, and dishwashing liquid made with real lemons?

Why isn't there mouse-flavored cat food?

Why didn't Noah swat those two mosquitoes?

Why do they sterilize the needle for lethal injections?

Why don't sheep shrink when it rains?

Why are they called apartments when they are all stuck together?

If flying is so safe, why do they call the airport the terminal?

If con is the opposite of pro, is Congress the opposite of progress?

God's best blessings to you, (John 15:11, John 16:24)
